
NOLTA GmbH strives to make a contribution to improving the health and safety of citizens and protecting the environment. Therefore, it supports the objectives of the REACH regulation. NOLTA GmbH is a manufacturer of motor protection plugs, level controllers and control systems. It does not produce any chemical substances, nor is it a downstream user as it does not distribute self-formulated mixtures. NOLTA GmbH is merely a user that processes parts containing mixtures which then go into their products.

Under normal and reasonably foreseeable conditions of use no substance is released from the products of NOLTA GmbH.

Therefore, the obligation to register as well as the obligation of creating and publishing safety data sheets are eliminated.

Whether substances of the SVHC candidate list in accordance with Article 33 of the REACH Regulation are included in the products delivered to NOLTA GmbH is checked at regular intervals by querying the suppliers.

This query finally showed that some alloys of metallic contact parts contain the following substances in a concentration of more than 0.1 by mass:

- Lead CAS: 7439-92-1 EG: 231-100-4

This query also showed that cable insulation contains the following substances in a concentration of more than 0.1 percent by mass:

- Decamethylcyclopentasiloxane (D5) CAS: 541-02-6 EG: 208-764-9
- Dodecamethylcyclohexasiloxane (D6) CAS: 540-97-6 EG: 208-762-8

These three substances concern the SiHF cable used in the MS1 S / KR1 S product groups.

We would like to point out that the SVHC candidate list is not a prohibited list. The SVHC candidate list can be viewed at https://echa.europa.eu/de/home.

NOLTA GmbH hereby declares the conformity of their products in accordance with the RoHS Directive 2011/65/EU and the extension 2015/863/EU. This is also continuously monitored at its suppliers.

The information given, is compiled to the best of one’s knowledge and belief. It corresponds to the respective state of the art and our findings. The information provided does not constitute an assurance of a specific product property in the sense of a warranty.
